

From Culham Innovation Centre to Global Fusion Leader

How **Tokamak Energy** grew from a 3
person spin-out into a world-leading
fusion company

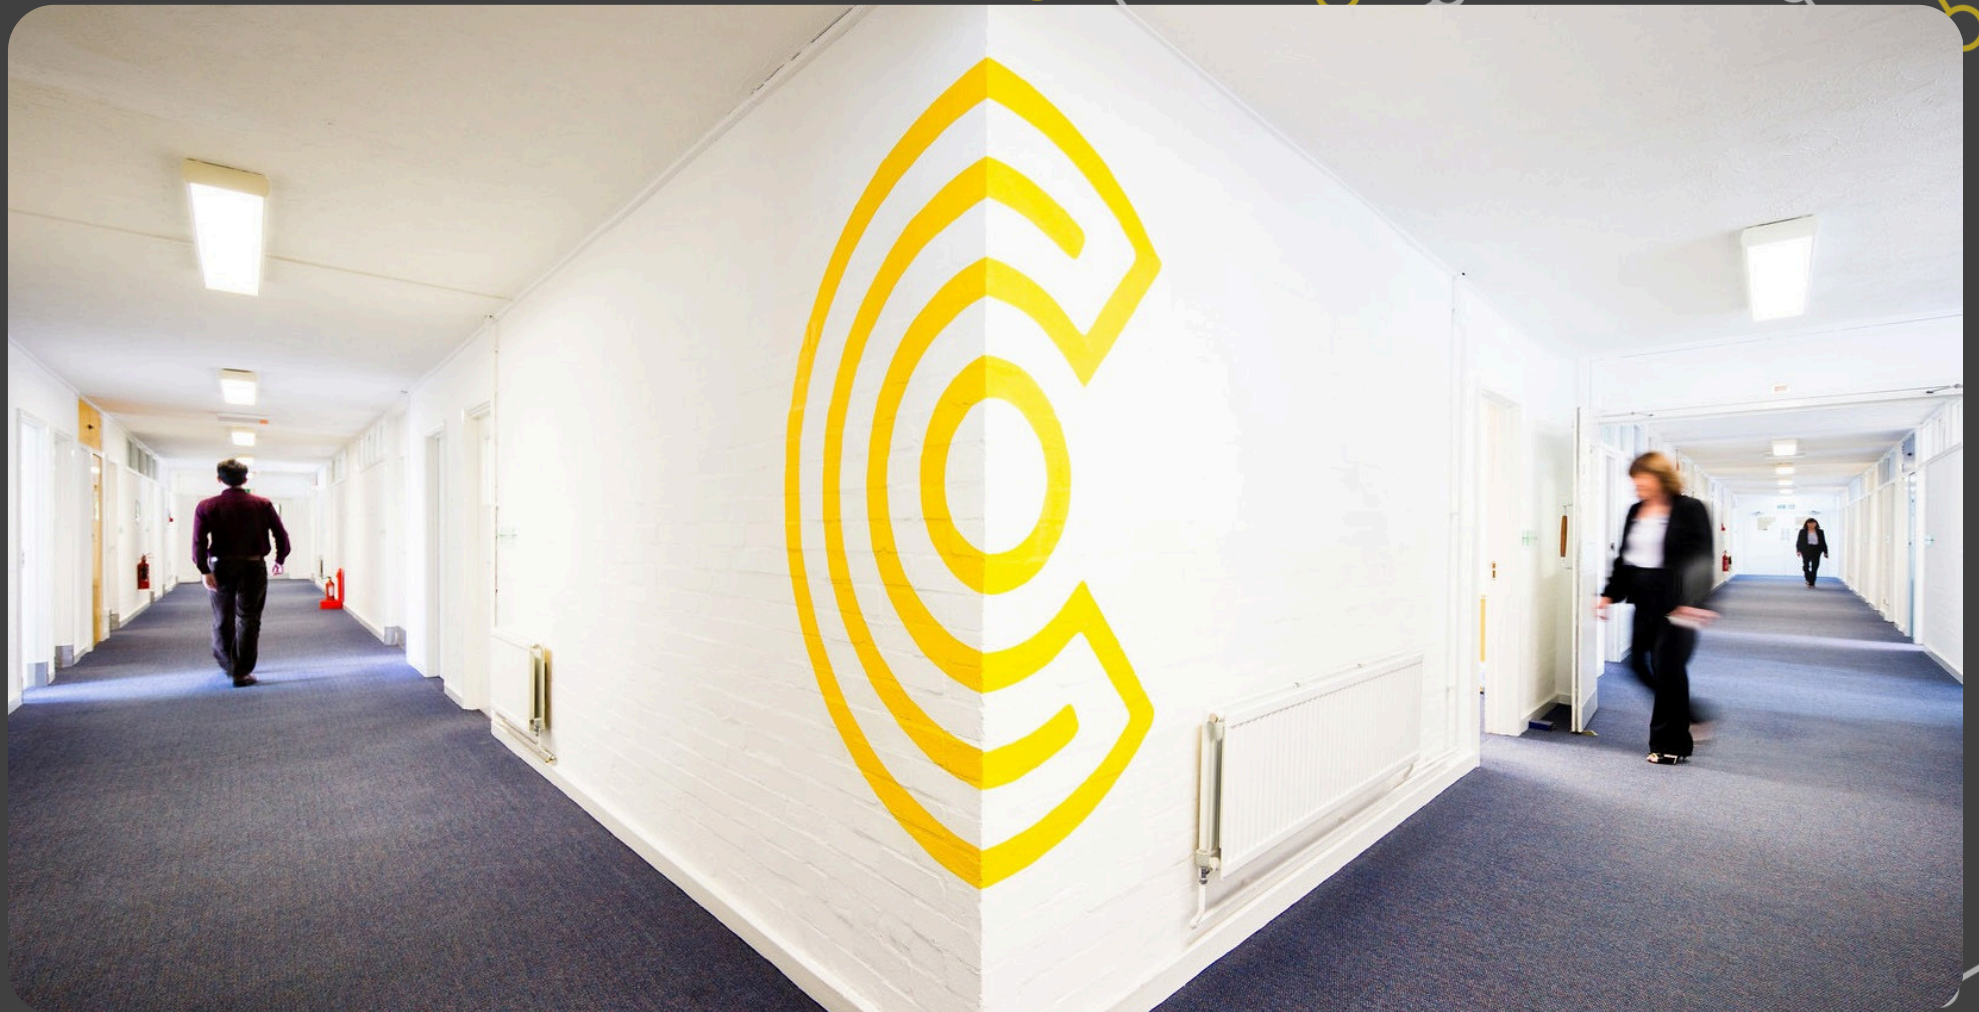

Since 2001, **Culham Innovation Centre** has supported science and technology startups at the heart of the UK's fusion ecosystem.

Tokamak Energy is one of our remarkable success stories.

Where it began...

- 3 person spin-out from UKAEA
- Fusion seen as a distant ambition
- First office at Culham Innovation Centre

Goal: Accelerate fusion commercialisation

Early stage support that made a difference

Flexible Space

UK Atomic
Energy
Authority

Close to UKAEA

Investor Credibility

Technical Focus

We wouldn't be where we are now without the early-stage support we received. Culham Innovation Centre helped us tap into available programmes and grants in addition to providing us with flexible space and in-house support. For us, it was the perfect place to start.
